AIR OPERATOR CERTIFICATION

CASAS Advisory Pamphlet

Country _____ SURINAME _____
Civil Aviation Authority

Subject: CERTIFICATION OF AN AIR OPERATOR
CASAS Advisory Pamphlet Document CAP-001
Date: 08/11/01

1. PURPOSE.

- a. This CASAS Advisory Pamphlet (CAP) describes the process of applying for and obtaining an Air Operator Certificate (AOC) to conduct commercial air transport operations under CASAS Advisory Pamphlet Civil Aviation Regulations SURINAME (CARS). The certification process may appear to be a complex undertaking, particularly to a “first-time” operator. This CAP provides basic information applicable to the certification process. This CAP does not describe the process for obtaining an AOC when the AOC applicant proposes to conduct maintenance under the equivalent system of maintenance referenced in Part 9 of the CARS.
- b. Because there are a variety of acceptable methods for preparing manuals, including training manuals, a detailed discussion of acceptable methods for preparing these documents is not in this CAP. Operators will be briefed in as much detail as necessary regarding the preparation of manuals and other required documents during meetings with CASAS personnel. The information in this CAP and the reading material referenced in this CAP will assist the operator in completing the process with minimal delays and complications.

2. RELATED REGULATIONS.

Civil Aviation Safety Act (CASAS Advisory Pamphlet Law), CASAS Advisory Pamphlet Civil Aviation Regulations (CARS) Parts 1, 2, 4, 5, 6, 7, 8, 9, 10

3. RELATED READING MATERIAL.

- a. The CASAS (the Authority) publishes the “Advisory Pamphlet Checklist” and “Guide to Civil Aviation Publications.” These documents provide more complete information on advisory pamphlets and other CASAS publications and how they may be obtained.
- b. Air Transport Operator economic regulatory functions are under the jurisdiction of the MINISTRY OF TRANSPORT .

(Note: the economic authority requirements will be determined by the MINISTRY OF TRANSPORT).

4. BACKGROUND.

- a. To conduct Commercial Air Transport Operations under CASAS regulations, an operator must be a citizen as defined in Suriname Aviation Law. The CASAS recognises the responsibility of Commercial Air Transport Operators to provide air transportation with the highest degree of safety possible in the public interest. The certification process is designed to ensure that prospective AOC holders understand and are capable of fulfilling this duty. When satisfactorily completed, the certification process should ensure that the operator is able to comply with the Suriname Aviation Law, CASAS regulations, and the international standards pertaining to the operation of aircraft as published in relevant ANNEXES to the convention on international civil aviation.
- b. There are five phases in the air operator certification process. Each phase is described in sufficient detail to provide a general understanding of the entire certification process. (See appendix 6 for a detailed flow chart of the entire certification process). The five phases are:
 - (1) Pre-application
 - (2) Formal Application
 - (3) Document Evaluation
 - (4) Demonstration and Inspection
 - (5) Certification
- c. In some cases, the guidance and suggested sequence of events in this CAP may not be entirely appropriate. In such situations, the CASAS and the operator should proceed in a manner that considers existing conditions and circumstances. The operator, however, should not expect to be certificated until the CASAS is assured that the Suriname's aviation law and its Civil Aviation Regulations will be complied with in an appropriate and continuing manner.

PHASE 1 PRE- APPLICATION PHASE	PHASE 2 APPLICATION PHASE	PHASE 3 DOCUMENT EVALUATION PHASE	PHASE 4 DEMONSTRATION AND INSPECTION PHASE	PHASE 5 CERTIFICATION PHASE
---	--	--	---	--

5. PRE-APPLICATION PHASE.

- a. As far in advance as possible of an anticipated start of operations, a prospective operator should contact the nearest CASAS Office and inform the CASAS of its intent to apply for an AOC. The prospective operator will be invited to meet briefly with CAA personnel. During this initial meeting, only basic information and general certification requirements will be discussed. If the prospective operator intends to proceed with certification, CASAS Advisory Pamphlet Form (CF -01) Prospective Operators Pre-assessment Statement (POPS) will be furnished. A sample of this form with instructions for completing it is in Appendix 1. The POPS should be completed, signed by the prospective operator, and returned to the CASAS Office.

- b. CASAS personnel will review the POPS. If the information is incomplete or erroneous, the POPS will be returned to the prospective operator with the reasons for its return noted in Section 2. If the information is complete and acceptable, the CASAS will determine which CASAS office will be assigned to the certification project and schedule a pre-application meeting with the prospective operator and the selected CASAS certification team members.
- c. The CASAS office will designate one certification team member as the Project Manager (PM). The PM is the official CASAS spokesperson throughout the certification project.
- d. The purpose of the pre-application meeting is to confirm the information on the POPS and to provide critical certification information to the applicant. It is recommended that the operator's key management and staff attend these pre-application meetings and be prepared to discuss in general terms the plans and specific aspects of the proposed operation. Many problems can be avoided by discussing all aspects of the proposed operation and the specific requirements, which must be met to be certificated as an air operator.
- e. It is important to establish good working relationships and clear understandings between the CASAS and the operator's representatives. The CASAS recognises that a wide range of capabilities and expertise exists among operators. This background experience will be considered by the CASAS and adjusted to during these initial meetings.
- f. To help promote understanding throughout the certification process, an application information package will be provided during the pre-application meeting. The application information package includes the following:
 - (1) The certification job aid that will be used by CASAS inspectors during the certification project.
 - (2) A schedule of events which must be completed and submitted with the formal application.
 - (3) An example set of Specific Operating Provisions (SOPs).
 - (4) Other publications or documents the PM believes will be useful to the operator.
- g. CARS 9.1.1.5 (a) and (b) specifies that an application for an AOC shall be made in a form and manner acceptable to the Authority; and, containing any information the Authority requires the applicant to submit. It is important to understand the minimum documentation necessary to be considered acceptable for a formal application. Formal application must be made on either a form provided by the Authority or by letter [see Appendix 2.] requesting certification as an air operator. The accountable manager must sign the form or letter. If a letter is submitted, it should include a statement that the letter serves as formal application for an Air Operator Certificate. It should also contain the full and official name of the applicant. The letter shall contain the physical location address of the applicant's intended primary operating location. The applicant's mailing address shall be included in the formal application letter if different than its letterhead. Additionally, the letter will confirm the identity of key management personnel such as the General Manager, Director of Operations, Chief Pilot, Director of Safety, Director of Maintenance, Quality Manager, as applicable. Certain documents must be submitted with the formal application. These documents (attachments) are briefly described in paragraphs 5h through 5q and will be discussed in detail during the pre-application meeting.
- h. Draft Specific Operating Provisions Attachment. This attachment describes the applicant's intended authorisations, limitations, provisions, and privileges specific to the operator's operations.
- i. Air Operator Certification Job Aid and Schedule of Events Attachment. The schedule of events [see Appendix 3] is a key document that lists items, activities, programs, and aircraft

and/or facility acquisitions that must be accomplished or made ready for the CASAS' inspection before certification. It should include dates when the crewmembers will start company indoctrination procedures. In addition, the schedule of events should include dates when maintenance personnel training will start; when maintenance facilities will be ready for the CAA's inspection; when each of the required manuals will be available for evaluation; when aircraft will be ready for inspection; when terminal facilities will be ready for inspection; when emergency evacuation demonstrations; ditching demonstrations, and demonstration flights are planned to be performed, and the date of the proposed assessment of Chief Training and Checking Officer and other approved persons. These estimated dates must be logical in terms of sequence. For example, the estimated date for crewmember basic company procedures indoctrination ground training to begin should be after the date that sections of the company manuals pertinent to crewmember performance will be completed and submitted. Reasonable time for the CASAS to review, inspect, and approve each item or event should also be provided when approval is required before beginning a subsequent event or item. Failure to accomplish an item or event in a satisfactory manner or in accordance with the schedule of events could delay the certification. If at any time during the certification process the operator finds it necessary to revise the schedule of events, the PM should be notified as soon as practical.

j. Company General Manuals Attachment. These manuals, which may be issued in separate parts for specific users, contain information about the operator's general policies, duties and responsibilities of personnel, operational control policy, and procedures. These are commonly referred to as the Operations Manual and the Maintenance Control Manual. CARS require these manuals to include instructions and information necessary to permit flight, ground, and contract personnel to perform their duties and responsibilities with a high degree of safety. CARS Part 9, including the Implementing Standards (IS) prescribe the content of these manuals. The entire manual system, as required by sections 9.3 and 9.4 of the CARS, shall be completely developed at the time of formal application.

k. Training and Checking Manuals. It is recognised that aircraft acquisition, facility arrangements, and certain training program elements may not be fully developed at the time of formal application. The company initial training curriculum portion of the Training Manual (completed to the extent possible) must be attached to the formal application letter or form. Initial training curricula must include at least the following curricula segments:

- (1) Company Procedures Indoctrination Training (CARS 8.10.1.9 and 9.2.2.9)
- (2) Initial Emergency Equipment Drills Training (CARS 8.10.1.13)
- (3) Initial Aircraft Ground Training (CARS 8.10. 1.14)
- (4) Initial Aircraft Flight Training (CARS 8.10. 1.15)

l. Management Structure and Qualification Attachment.

(1) CARS establish basic management positions and the implementing standards establish minimum qualifications for air operators proposing to conduct scheduled or charter commercial air transportation operations. It may be possible to obtain a deviation from these required basic management positions and qualifications, depending on the complexity of the planned operation. Individuals assigned to the required management positions are expected to have a thorough knowledge of the operator's company manuals, operating provisions, the CARS and the planned operations relevant to the position. This attachment must contain resumes of the qualifications, licenses (including license numbers), ratings, and aviation experience for each of the following positions, or their equivalent:

- (i) Accountable Manager (Chief Executive Officer or General Manager)
- (ii) Director of Operations, or Senior Officer of Flying Operations

- (iii) Chief Pilot
- (iv) Director of Safety, or Chief Flight Safety and Accident Prevention
- (v) Quality Manager
- (vi) Director of Maintenance

(2) If a deviation from the management requirements is anticipated, it should be noted in the formal application letter. The actual request for deviation, however, must be made in a separate petition, which presents specific justification. This request for a deviation should be made to the CASAS as soon as practical to enable the individual who will hold the position to be involved early in the certification process.

m. Documents of Purchase, Leases, Contracts, and/or Letters of Intent Attachments. These attachments should provide evidence that the operator is in the process of actively procuring aircraft, facilities, and services appropriate to the type of operation proposed. If formal contracts are not completed letters or other documents showing preliminary agreements or intent will suffice until such date as determined by the Authority. Examples of the types of equipment, facilities, and services that should be addressed in these documents are as follows:

- (i) Aircraft
- (ii) Station facilities and services
- (iii) Weather gathering facilities and services
- (iv) Communications facilities and services
- (v) Maintenance facilities and services
- (vi) Maintenance contractual arrangements
- (vii) Aeronautical charts and related publications
- (viii) Aerodrome analysis and obstruction data
- (ix) Contract training and training facilities

n. Initial Statement of Compliance. This attachment should be a complete listing of all CARS applicable to the proposed operation. Pertinent subparts and each relevant section of the regulation should be identified and accompanied by a brief description, or preferably a specific reference, to a manual or other document. The brief description or reference must describe the method of compliance for each regulation listed. If the precise method of compliance has not been developed at the time of formal application, an indication of the date that this information will be provided will suffice, if the date provided is reasonable, and acceptable to the Authority. The following examples are samples of how relevant sections of CARS should be presented in a Statement of Compliance.

EXAMPLE 1.

 Statement of Compliance - method of compliance ***not developed*** at time of formal application.
 CARS: 9.3.1.19 Aeronautical Data Control System.
 This system is currently under development and will be submitted for approval on (date).

EXAMPLE 2.

 Statement of Compliance - method of compliance ***fully developed - preferred presentation***
 CARS: 9.3.1.22 De-icing and Anti-icing Programme.
 Flight Operations Manual (FOM) p. 129, para. 243;
 Maintenance Control Manual (MCM) p. 45, para. 12.5.

EXAMPLE 3.

 Statement of Compliance - method of compliance ***fully developed - acceptable presentation.***

CARS: 8.3.3.19 Reporting mechanical irregularities.

The air operator instructs the pilot in command (PIC) on the requirements for and methods of completing the technical log of the aeroplane. The PIC is required to review the technical log before each flight and to ascertain the airworthiness status of the aeroplane by checking each previous log entry. The MCM instructs maintenance personnel on the requirement to record discrepancies discovered during pre-flight checks and other types of checks.

- o. Financial Economic and Legal Matters Assessment. This attachment should consist of written evidence that the applicant has undergone, is undergoing, or is scheduled to undergo a financial, economic, and legal matters assessment.
- p. List of Aircraft. This attachment should consist of a list of aircraft, (by make, model, and series) that the applicant intends to operate.
- q. List of Designated Destination and Alternate Aerodromes. This attachment is required if the applicant is applying for scheduled domestic or scheduled international operations.
- r. A thorough understanding of pertinent regulations and advisory materials is critical to the success of the entire certification process. The operator and key management personnel must understand which regulations apply to the intended operation. A sample list of CARS as they apply to various kinds and types of operations is in Appendix 4.
- s. During the pre-application phase and throughout the certification process, the operator will have to prepare documents and manuals for the CASAS's evaluation and approval or acceptance. The operator is encouraged to informally co-ordinate drafts of these documents with the CPM and other inspectors assigned to the certification project. Time spent on informal co-ordination can significantly reduce the workload for the operator and the inspectors once the formal application is submitted. The inspectors will give advice and guidance; however, the actual development of acceptable documents and manuals is always the responsibility of the operator.

6. FORMAL APPLICATION PHASE.

- a. It is recommended that the formal application is submitted at least 90 days before revenue operations are expected to begin, although the application should be submitted to the CAA Authority as far in advance of the proposed start-up date as possible.
- b. The CAA will review the application to determine that it contains the required information and attachments. If there are omissions or errors, the formal application and all attachments will be returned with a letter outlining the reasons for its return. If the operator has a good understanding of the requirements, the formal application should be of sufficient quality to allow any omission, deficiency, or open question to be resolved during the formal application meeting.
- c. The operator's key management personnel should attend the formal application meeting. The purpose of the meeting is to discuss the formal application and resolve omissions, deficiencies, or answer questions from either party. For example, this meeting may be used to resolve questions concerning the applicant's package or scheduling date conflicts, or to ensure the applicant understands the certification process. This meeting should also be used to reinforce open communication and working relationships.
- d. If the formal application meeting is successful, the operator is provided with a letter acknowledging receipt and acceptance of the package. The CASAS's acceptance of a formal application does not constitute approval or acceptance of individual attachments. These documents will be evaluated thoroughly during subsequent phases of the certification process.

If, the formal application is not accepted, it will be returned with a written explanation of the reasons for its return.

7. DOCUMENT EVALUATION PHASE.

- a. After the formal application has been accepted, inspectors will begin a thorough evaluation of all the manuals and documents that are required by regulation to be submitted to the CASAS. The CASAS will endeavour to complete these evaluations in accordance with the operator's schedule of events. If a manual or document is incomplete or deficient, or if non-compliance with the regulations or safe operating practices is detected, the manual or document will be returned for corrective action. If the manuals and documents are satisfactory, they will be approved or accepted, as required by CARS. Approvals may be indicated by letter as appropriate, or by approval of Specific Operating Provisions (SOPs). Acceptance of information that does not require formal approval will be indicated by letter or by the lack of the CASAS's objection to the information.
- b. The complexity of the information which must be addressed in the operator's manuals and other documents depends on the complexity of the planned operation. The following list provides examples of information that must be provided by the operator and evaluated by the CASAS during this phase:
 - (1) Management personnel resumes outlining proposed management qualifications and civil aviation compliance histories.
 - (2) Operations Manual (may be in one or more parts).
 - (3) Maintenance Control Manual (may be in one or more parts). Includes the Approved Maintenance Organisations (AMO) Maintenance Procedures Manual (MPM).
 - (4) Aircraft maintenance programs and supporting manuals such as Maintenance Review Board (MRB) and Corrosion Prevention Control Program (CPCP).
 - (5) Mass and balance procedures/program.
 - (6) Training Program Manual.
 - (7) Approved Aircraft Flight Manual.
 - (8) Aircraft Operations Manual.
 - (9) Minimum Equipment List (MEL) and MEL Management Program
 - (10) Configuration Deviation List (CDL).
 - (11) Cockpit checklist.
 - (12) Passenger briefing cards.
 - (13) Noise and emission plan (if applicable).
 - (14) Airport Runway Analysis
 - (15) Deviation requests.
 - (16) Dangerous Goods.
 - (17) Cabin Attendant Manual.
 - (18) Dispatch/flight following/flight locating procedures.
 - (19) Draft Specific Operating Provisions (operations and airworthiness).
 - (20) Maintenance Reliability Program (optional).
 - (21) Plan for Demonstration Flights.

- (22) Emergency evacuation demonstration plan.
- (23) Ditching demonstration plan.
- (24) Fully completed Statement of Compliance.

c. The fully completed Statement of Compliance is the final evolution of the Initial Statement of Compliance that was submitted with the formal application. The fully completed Statement of Compliance ensures each applicable regulatory requirement has been adequately addressed in the appropriate manuals, programs, and/or procedures.

8. DEMONSTRATION AND INSPECTION PHASE.

- a. CARS require an operator to demonstrate its ability to comply with regulations and safe operating practices before beginning actual revenue operations. These demonstrations include actual performance of activities and/or operations while being observed by CASAS inspectors. This includes on-site evaluations of aircraft maintenance equipment and support facilities. During these demonstrations and inspections, the CASAS evaluates the effectiveness of the policies, methods, procedures, and instructions as described in the operator's manuals and other documents. Emphasis is placed on the operator's management effectiveness during this phase. Deficiencies will be brought to the attention of the operator and corrective action must be taken before a certificate is issued.
- b. Although the document evaluation and the demonstration and inspection phases have been discussed separately in this CAP, these phases overlap, or are accomplished simultaneously in actual practice. The following list provides examples of the types of items, equipment, facilities, and activities evaluated during the demonstration and inspection phase.
 - (1) Conduct of training programs (classroom, simulators, aircraft, flight and ground personnel training).
 - (2) Crewmember and Flight Operations Officer testing and certification.
 - (3) Station facilities (equipment, procedures, personnel, fuelling/Defuelling, de-icing, technical data).
 - (4) Recordkeeping procedures (documentation of training, flight and duty times, flight papers).
 - (5) Flight control (Flight Supervision and Monitoring system or Flight Following system)
 - (6) Maintenance and inspection programs (procedures, record keeping).
 - (7) Aircraft (conformity inspection, aircraft maintenance records, etc.).
 - (8) MELs and CDLs (compliance with operating and maintenance procedures, etc., if applicable).
 - (9) Mass and balance program (procedures, accuracy, and document control).
 - (10) Passenger emergency evacuation demonstration (aborted takeoff demonstration and ditching demonstration).
 - (11) Demonstration Flights. Includes full-scale simulation of revenue operations to demonstrate the ability to operate independently, safely, and in compliance with all applicable MCARs.
- c. The Demonstration and Inspection Phase outline under paragraph 8a. through 8b. is only applicable to the certification of an air operator.

NOTE:

An applicant for an air operator certificate (AOC) may concurrently seek CASAS approval of its maintenance organisation. The applicant needs to co-ordinate the progress of both certification projects. Both certification projects must be in the Demonstration and Inspection Phase at the same time. This is because the Demonstration Flights cited under CARS 9.2.3.6 (a), require the applicant to demonstrate to the CASAS all proposed flight and ground operations. The applicant therefore will also be expected to demonstrate use of its Approved Maintenance Organisation to

ensure that procedures in the Maintenance Control Manual (MCM) and Maintenance Procedures Manual (MPM) are in agreement.

9. CERTIFICATION PHASE.

- a. After the document compliance and the demonstration and inspection phases have been completed satisfactorily, the CASAS will prepare an Air Operator Certificate and approve the SOPs. The SOPs contain authorisations, limitations, and provisions specific to an operator's operation. The operator must acknowledge receipt of these documents.
- b. The certificate holder is responsible for continued compliance with CARS and the authorisations, limitations, and provisions of its certificate and SOPs. As a certificate holder's operation changes, the SOPs will be amended accordingly. The process for amending SOPs is similar to the certification process. In some cases it may be a less complex procedure depending on the subject of the amendment. The CASAS is responsible for conducting periodic inspections of the certificate holder's operation to ensure continued compliance with the CARS and safe operating practices.

10. EXPLANATION OF APPENDIXES IN THIS ADVISORY PAMPHLET.

- a. Appendix 1 provides instructions on how CASAS Advisory Pamphlet Form CF-01: Prospective Operator's Pre-Assessment Statement (POPS) should be completed. Section 1, items 1 through 11, should be completed and signed by the applicant and returned to the appropriate CASAS office. Sections 2 and 3 are reserved for CASAS use.
- b. Appendix 2 provides a sample formal application letter.
- c. Appendix 3 provides a certification job aid and schedule of events.
- d. Appendix 4 provides a list of applicable CASAS Advisory Pamphlet regulations.
- e. Appendix 5 provides definitions of terms as they are used in the certification process.
- f. Appendix 6 provides a detailed flow chart of the entire certification process.
- g. Appendix 7 provides a list of Manuals and Documents to be submitted with the formal application letter.

Name: _____

Director Civil Aviation Safety Authority Suriname

APPENDIX 1. INSTRUCTIONS FOR COMPLETING CASAS ADVISORY PAMPHLET FORM CF-01 PROSPECTIVE OPERATOR'S PRE-ASSESSMENT STATEMENT (POPS). THIS CASAS ADVISORY PAMPHLET FORM IS TO BE COMPLETED BY AN AIR OPERATOR OR MAINTENANCE ORGANISATION APPLICANT.

SECTION 1A. All applicants shall complete this section.

1. Enter the company's official name and mailing address. Include any other business name if different from the company name).
2. This address shall be the physical location where primary operating activities are based. It is where the offices of management required by regulation are located. If the address is the same as item 1, enter "same." Include secondary business addresses of operation and identify the type of operation conducted.
3. Enter the estimated date when operations or services will begin.
4. This information will be used to assign a company identification number. You may indicate up to three, three-letter identifiers, such as ABC, XYZ, etc. If all choices have been assigned to other operators or maintenance organisations, a randomly selected number will be assigned.
5. Enter the names, titles, and telephone numbers of management personnel required by CARS 9.2.2.2.

NOTE: Management personnel qualification requirements are specified in CARS Part 9 Implementing Standards (IS) 9.2.2.2.

SECTION 1B. All applicants shall complete this section, as appropriate.

6. Indicate if the air operator intends to perform maintenance as an Approved Maintenance Organisation (AMO) or intends to contract out all or part of its maintenance, or perform its own maintenance using an equivalent system.
7. The proposed type of operation shall be indicated. Check as many boxes as apply.
8. The proposed type of maintenance organisation and ratings shall be indicated. Check as many boxes as apply.

SECTION 1C. Air Operators shall complete Blocks 9, 10.

9. Aircraft Data is to be provided here. Indicate number and types of aircraft by make, model, series, and number of passenger seats or cargo payload capacity. For foreign registered aircraft, provide a copy of the lease agreement.

Appendix 1 Page 1 of 4

10. Indicate geographic areas of intended operation and proposed route structure.

SECTION 1D. All applicants shall complete this section.

11. Show any information that would assist CASAS personnel in understanding the type and scope of operation or services to be performed by the applicant. If an air operator intends to arrange for maintenance and inspections of its aircraft and/or associated equipment identify the approved maintenance organisation selected and a list of the maintenance or inspections it proposes to perform. Also provide all written contracts with this form, if applicable.

12. Identify the type of aircraft and/or simulators.

For AOC's identify the type of aircraft and/or simulators intended to be used.

For AMO's, identify the type of aircraft by make and model. In addition identify the type of training that the Quality Assurance staff, certifying staff and maintenance personnel will receive based on the ratings requested.

13. The Prospective Operator Pre-assessment Statement (POPS) denotes an intent to seek CASAS certification as an air operator or approved maintenance organisation. It must be signed as follows:

Type of Organisation	Authorised Signature
-----	-----
Individual	Owner
Partnership	At least one partner
Company, corporation, association, etc.	At least one authorised officer

The Accountable Manager must sign the POPS Form. If the POPS Form is signed by another individual which is not the Accountable Manager the accountable manager must submit with the POPS Form a letter addressing his/her authority to do so.

SECTIONS 2 and 3. For CASAS Use.

FIGURE 1. CASAS FORM CF-01 PROSPECTIVE OPERATOR'S PRE-ASSESSMENT STATEMENT (POPS) ----- (FRONT PAGE)

Prospective Operator's Pre-assessment Statement (POPS) (To be completed by Air Operator or Approved Maintenance Organisation)		
Section 1A. To be completed by all applicants		
1. Name and mailing address of company (include business name if different from company name)	2. Address of the principal (main) base where operations will be conducted, include address of secondary base of operation, if appropriate (do not use a post office box).	
3. Proposed Start-up Date:	4. Requested company identifier in order of preference 1. 2. 3.	
5. Management and Key Staff Personnel		
Name (Surname) (First Name/s)	Title	Telephone & address if different from company (Include country code)

APPENDIX 2. SAMPLE FORMAL APPLICATION LETTER

(Name of Applicant)
(Appropriate Address)

[Date]
Civil Aviation Authority
Attn: (Name), Manager
(Appropriate Address)

Dear (Name):

This letter serves as formal application for a Civil Aviation Safety Authority (CASAS) air operator certificate. (Name of Applicant), initially intends to certificate and operate as a [scheduled or non-scheduled passenger, freight, or mixed passenger and freight] commercial air transport operation under Parts 8 and 9 of the CASAS Advisory Pamphlet Civil Aviation Regulations Suriname (CARS). We intend to use (Number and Type) aeroplane(s) between (location) and (location). We have enclosed a copy of [(our report of) or (our filing with) (identify the STATE agency)] for a Financial Economic and Legal Matters assessment.

Our company will have its principal base of operations and corporate offices located at (appropriate address). Our maintenance base (if company intends to conduct maintenance under its AOC) will be located at (appropriate address) (if the company intends to apply under separate cover for an approved maintenance organisation, so state here). A copy of our contract with (name of maintenance organisation) is enclosed. Our management personnel are as follows:

President and Accountable Manager – Mr. Rolland Malev
Director of Operations and Dispatch – Mr. Peter Berman
Director of Maintenance – Mr. Lee Wing
Quality Manager – Mr. William Jackson
Chief Pilot – Mr. Nathan Moskowitz
Director of Training – Ms. Brenda Hoff
Director of Safety – Mr. Bruno Luccasi

Also enclosed is the revised Schedule-of-Events and Initial Statement Of Compliance which was agreed to at our-last meeting with your representatives. We have retained the services of Mr. Anwar Hussun (appropriate address) as our agent for service.
Sincerely,

Rolland Malev
President
Enclosures

U.S. Department of Transportation
Utilisation and Storage Section, M-443.2
Washington, D.C. 20590

APPENDIX 5. DEFINITIONS

The following appendix defines terms used in this advisory pamphlet and/or the certification process.

“Certificate holding office” means the CASAS Office, which has responsibility for administering the certificate and is charged with the overall inspection of the certificate holder’s operations.

“Commercial Air Transport” means an aircraft operation involving the transport of passengers, cargo, or mail for remuneration or hire.

“Scheduled operation” means an aircraft operation conducted by a commercial air transport operator for which the certificate holder or its representative offers in advance the departure location, departure time, and arrival location.

“Charter operation” means operations for which the departure time, departure location and arrival locations are specifically negotiated with the operator’s customer or the customer’s representative.

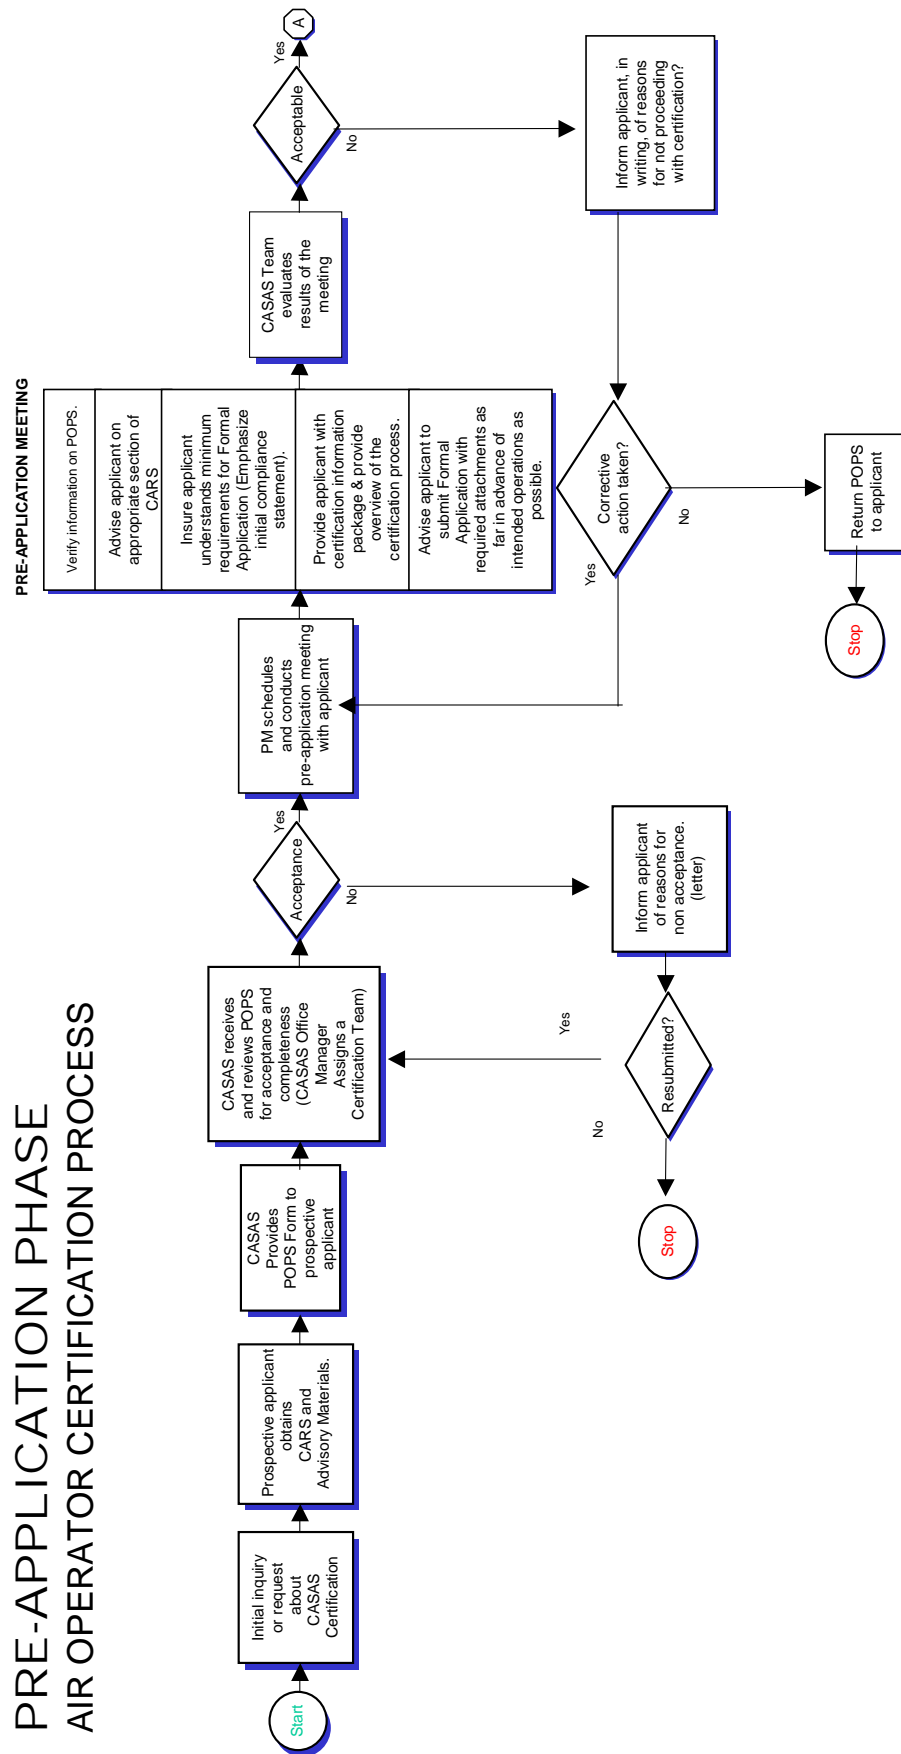

“Passenger carrying operation” any aircraft operation carrying any person other than a crewmember, company employee, authorised government representative, or person accompanying a shipment.

“Principal base of operations” means the primary operating location of a certificate holder as designated by the CASAS.
